

# WEB DEVELOPER

Relogix has a ground floor opportunity for someone entrepreneurial and passionate about building great software products. As a highly skilled Web Developer, you will analyze user requirements and then design and build a world class SAAS product. In this position, you will help us to design, architect and commercialize our innovative new product for the Building Internet of Thing. We are looking for someone passionate about building software that customers will rave about.

## Responsibilities

- Develop the SaaS platform and Mobile application for the Internet of “Things” in Buildings
- Help architect and design a highly intuitive platform from the ground up
- Implement clean, maintainable, and testable code, working in tandem with other developers
- Work with data scientists to automate the feed of sensor data into our cloud based data analytics platform.
- Be a collaborative, active contributor to the agile engineering team
- Adapting and supporting workflows with the use of technology in the following areas: “Things” Inventory Management, Customer Metadata Management, Data Integration Tools, “Things” Network Operations and Monitoring Tools and “Things” Installer Support Tools

## Skills Qualifications

- MUST live in Ottawa.
- Bachelor’s Degree in Computer Science or equivalent
- Minimum 3 years’ hands-on experience developing a commercial software product
- Experience designing and building a responsive and highly intuitive web front end
- Experience and understanding of UX design best practices for web and mobile devices
- Solid experience with C# / .NET Framework, HTML5, CSS, AngularJS, Bootstrap and Visual Studio
- Some experience with HTTP-based Web Services, MS SQL, MVC and Azure Components
- Experience with mobile application development with framework like Cordova
- Some knowledge of multi-tenant SaaS environments
- Knowledge of responsive application development for web and all things mobile
- Experience with Visual Studio Online and Git version control
- Solid communications skills including writing, documentation and people skills
